

XL - VIP - MODUL

Particularly Valuable for Particularly Valuable Guest.

Equipment: The equipment includes a lighting device and an automatic air conditioning which either heats or cools as you desire.

Access: The module and the roof terrace are reached via a handrail protected staircase. In the lowered version, it can also be entered without any problem by persons with a walking impediment.

Catering: In the front area, the mini-kitchen offers a sink with fresh- and waste-water tank, a refrigerator for drinks, a micro-wave, a coffee-/tea machine and a dish-washer.

Control: Optionally, the module can be equipped with a Europe-wide locating system, so that you are permanently able to check the current location.

Network: A modern CAT5/T5/6-network cabling enables the connection of up to ten PC's and/or printers and other IT-devices.

Individuality: We will configure the IT-equipment according to your needs.

Audio: Upon request, there is also the possibility of exterior connections for loudspeakers.

Video: The application of a beamer for data- or video presentations has been prepared.

Aerial: A GMS-aerial unit and the pre-equipment for a WLAN net have already been prepared.

Satellite: The SAT-reception of audio-/video- and data signals is just as possible as rapid Internet accesses and streaming transmissions.

Energy Supply: A current distribution with an exterior connection of 400 Volt (32A – 64 A/CEE) and/or 230 Volt enables a flexible application. Upon request, there is also the possibility of a self-supporting supply via an electric generator.

Flags: In an often unintelligible environment at fairs, two up to 7-metre high flagstaffs provide a clear orientation. An additional antenna mast can be extended to a maximum of 17 metres.

Colour: The basic colour of the module is silver (RAL MAN 9006) – supplemented by your own advertisement on the outer surfaces.

Dimensions: Length: approx. 6 metres, with stairs to the roof terrace approx. 9 metres – Width: approx. 2.50 metres – Height: 3,80 metres, lowered approx. 2,70 metres.

Area: The interior useful area is 4,90 metres x 2,21 metres x 2,18 metres; the area of the roof terrace is 6 metres x 2,5 metres.

Weight: According to the equipment, the module weighs approx. 3 to 4 tons. To this must be added the weight of the towing vehicle of approx. 5 tons.

Installation Time: Normally, the installation time is between 25 and 50 minutes.

Stand-by: For several operations – even at different locations – we offer favourable stand-by rents for your individually equipped module. This solution enables fast and reasonably-priced operations at any time.

Term of Rent: The minimum rental period is one day. For a longer term of rent at a fixed location without towing vehicle, we offer favourable conditions.

World-Wide: On principle, our modules are employable throughout Europe. For operations outside Europe, please ask for individual offers.

Light Weight: Several small modules can be moved easier as compared to the large systems, and take into consideration the weight limits at many well-frequented places.

Combination: We dispose of several modules which altogether provide a useful area of more than 170 square metres. They can be combined without any restrictions, and can be installed in T-, L- ore U- shape.

Transport: Upon request, your exhibits and goods can be carried along in a transport module which is installed on the towing vehicle (approx. 10 cubic metres).

Decoration: We dispose of a large stock of fixed and variable furnishing- and decoration objects witch we provide you with upon request.

Service: In cooperation with the advertising division and agencies, we offer comprehensive assistance, e.g. when searching for a location, with the catering or the hostess service.
